VacationTracker.net

VacationTracker.net is an internet-based HR system which is designed to simplify, manage and track the processes involved with employee absences.

All types of absences such as Annual Leave, Sick Leave, Maternity Leave, Jury Duty, Training days etc, are catered for.

Easy to use:

When an employee needs to request time off, they simply log in to VacationTracker.net and enter their login details. They will be presented with a clear view of their entitlements, they can view upcoming requests and they can request time off using a simple on-line form.

An email is then sent automatically to the employee's manager with details of the request.

The manager has full visibility of the staffing levels at the time of the request and of the requestor's entitlements and remaining days.

The manager can approve or reject each request with one click. When the decision is made the employee is informed automatically by email, their entitlement is updated and the time-off is recorded in the calendar. It's that simple.

Extra Benefits:

In addition to leave tracking, VacationTracker.net can be used to record other type of employee absences such as sick leave, jury duty or compassionate leave days.

By keeping track of these events it is very easy for the HR department to identify suspicious patterns of absences.

Our range of reports is flexible and ever-expanding — driven by our customer's requests.

Simple to deploy:

VacationTracker.net is delivered over the internet so it can be deployed quickly and easily.

The system is fully configurable for your organisation. Though the web-interface, you can configure your locations, departments, managers, hierarchy—even the colour scheme and logos your employees will see.

Affordable:

VacationTracker.net is priced per user, per month, so you can be sure that it is affordable and appropriate for your size of organisation.

The monthly fee includes all support and updates.

Feature List

For the employee:

- View the calendar
- Add, view and edit absence requests.
- Read company messages

For the manager:

- Manage team requests
- Group employees into teams and, assign "rules" to each team (e.g. minimum cover)
- Record sick leave and other absences
- Delegate requests to other managers when away for extended absences.

For the HR department:

- Proxy requests
- User management
- Generate reports
- Set company holidays
- Manage approvals hierarchy
- Manage locations
- Manage departments
- Deploy company notices
- Customise the look-and-feel

VacationTracker.net is an evolving product, and because it's delivered over the web, new features are available automatically as they become available.
